

For everyone to use the chartered bus with peace of mind

"Antiviral / antibacterial processing" verified by the International Organization for Standardization (ISO standard)

"Antibacterial full coating processing" is applied to all chartered bus vehicles owned by our company.

* What is SIAA (Antibacterial Product Technology Council)

An organization formed by a group of manufacturers of antibacterial and antifungal agents, antiviral, antibacterial and antifungal products, and antibacterial testing organizations with the aim of popularizing appropriate and reliable antibacterial and antifungal products. We have started issuing anti-virus approval. By applying antiviral and antibacterial processing, the effect of suppressing specific viruses and bacteria has been recognized for about 3 to 5 years.

This processing (construction: using SEIKADOU SRW-30 inorganic liquid agent) is influenza virus and feline calicivirus in the International Organization for Standardization (ISO) certification test, and meets the standards of SIAA (Antibacterial Product Technology Council). Antibacterial processing technology.

Ryujin Bus Co., Ltd. operates all chartered vehicles with "anti-virus + antibacterial + deodorant coating" as part of hygiene measures to protect the safety and security of our customers.

Although it is an unprecedented disaster with no prospect of ending, we are very happy that we, the Ryujin Group, will help us to create memories again after overcoming this difficult time.

We sincerely look forward to your use.
